Spring Larkin Arts,
Harrisonburg, Virginia
- 2013 ● High School
Graduation

ABOUT ME

I'm a major in Industrial Design at James Madison University. I'm also dabble in illustration, graphic design, and CS. growing up, I attended a private school whose focus was to teach it's students about independence, discipline, and creativity. I had an intense fascination with the world of art as well as an unquenchable intrgue in the field of physical science.

When being pushed to pursue one path over the other, I arrived at an impasse. While I was interested in pursuing the physical sciences, I was too tantilized with the freedom and satisfaction that came from art to seperate myself from it; so I decided to pursue both by studing industrial design. I now spend my years cultivating skills that would allow me to apply function and empathy to my ideas in an attempt to expand upon the evergrowing world of design.

Past Projects

- 2016 ● Educational Systems Design
- 2016 ● Furniture Design
- 2015 ● Medical Product Design
- 2014 ● Pet Product Design
